EDUCATION

- | | |
|---|--------------------|
| • Bachelors of Technology in Computer Science | 2021-2025 |
| Centurion University of Technology and Management , Bhubaneswar | CGPA:7.87 |
| • Higher Secondary (CHSE Board) | 2019-2021 |
| Royal College of Science and Technology, Bhubaneswar | Percentage : 68.5% |
| • Secondary Education (BSE Board) | 2018-2019 |
| SSVM, Dhenkanal | Percentage : 66.5% |

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML, CSS , Python
Frameworks & Libraries: React.js, Spring Boot
Backend & APIs: REST APIs, Node.js, Express.js
Databases: MongoDB, MySQL
Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, Eclipse, Jupyter Notebook, Android Studio
Core Concepts: Data Structures & Algorithms, DBMS, Operating Systems

PROJECTS

AI Agent (MERN Stack) Tech Used : React.js, Node.js, Express.js, MongoDB, Firebase Auth, Razorpay, Framer Motion

- Engineered a scalable AI-driven interview platform enabling real-time interview simulation and resume-based question generation
- Served 100+ users with 85%+ relevant question accuracy, improving interview preparation efficiency
- Reduced backend response time by ~30% via optimized REST APIs and MongoDB query tuning
- Implemented secure OAuth login using Firebase, ensuring reliable session management
- Integrated Razorpay payment gateway with <2s transaction latency for premium features
- Designed dynamic and responsive UI, increasing user engagement by ~40%

Face Recognition-Based Attendance System Tech: HTML, CSS, JavaScript, Python, OpenCV, SQL

- Built an automated attendance system using face recognition, eliminating manual tracking and reducing errors by ~85%
- Implemented real-time face detection and recognition using OpenCV, enabling accurate identification under varying conditions
- Designed a secure pipeline for face encoding, matching, and attendance logging
- Developed a responsive web interface for live camera capture and instant attendance marking
- Optimized processing to achieve low-latency recognition (<1s per user)
- Integrated SQL database for efficient storage, retrieval, and attendance analytics

License Plate Detection System (YOLOv8) Tech: Python, OpenCV, YOLOv8, PyTorch

- Developed a real-time license plate detection system using YOLOv8, achieving ~90% detection accuracy
- Processed images and live video streams with <1s inference time, enabling real-time performance
- Utilized OpenCV for preprocessing and PyTorch for model training, evaluation, and fine-tuning
- Improved robustness using data augmentation and hyperparameter tuning
- Built an optimized detection pipeline for fast and reliable localization in real-world scenarios

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Prodigy InfoTech (Internship)

INTERNSHIP

Web Developer Intern | Prodigy InfoTech

07 2024 – 08 2024

Completed a Web Development internship where I developed responsive and user-friendly web pages, designed interactive user interfaces, debugged and optimized frontend code for better performance, and collaborated on real-world projects while gaining practical experience in modern web development practices and problem-solving.
